GRAPHICS REQUIREMENTS

The following is a list of graphics requirements for reproduction and use on our displays.

Optimal and preferred graphics file types:

.ai (also called Illustrator file or Vector file)

.eps

.psd (Photoshop file)

Acceptable file types: (note: this does NOT guarantee high quality production as the “preferred” file types do)

300 dpi .jpeg/.jpg (dpi means “Dots Per Inch”)

.pdf (Adobe Acrobat format)

Images taken off the Internet from a website page are of poor or low quality and are unacceptable for quality production.

Please contact the correct department within your company to provide either the artwork itself or an FTP address to be provided to the Century Displays graphic dept. for download of the above mentioned file types.
